Claims 1-4 and 9-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase “the second low porosity layer being formed and laminated on the second low porosity layer” is confusing, since it implies that a layer is formed onto itself. The recitation that the value ranges of certain properties for the two low porosity layers are the same would render the scope of the claims indefinite except where the values for the properties are the same (which situation is not explicitly disclosed in the specification). If a particular sample of a layer is examined, its properties can be measured, but the range of permissible values cannot. Thus, if the values are different for the two layers, whether they still fall within the same range cannot be determined, without the range being explicitly claimed.

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1745

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
